Grant Activity

Grant Activity - Cover Crops	
Description	<p>First priority of this fund will be to apply for NRCS EQIP funding for Cover Crops (NRCS practice code 340). If projects that are marked as high local priority in the Crystal Lake Watershed are not funded by NRCS EQIP this fund will pick up those contracts. Projects will follow NRCS practice standards as guidelines.</p> <p>Goal is to get 1,489 acres of cover crops going in the watershed. The intent is to allow many landowners to try smaller acres with grant funds. From there the goal is landowner adoption on all acres.</p> <p>\$49.12 FY15 EQIP rate for 3 species cover crop mix We will pay 80% of the EQIP rate and landowner will match 20%. This will generate 25% match for this category.</p> <p>$\\$49.12 \times 80\% = \\39.30</p> <p>Grant Paid - \$175,500.00 $1,489 \text{ acres} \times \\$39.30 = \\$58,517.70 \times 3 \text{ yrs} = \\$175,553.10$ (We will cap the last payment at \$175,500.00)</p> <p>Landowner Match - \$43,875.94 (The Capped amount above will be added in as match) $1,489 \text{ acres} \times \\$9.82 = \\$14,621.98 \times 3 \text{ yrs} = \\$43,865.94$ Also include EQIP match for any contracts funded.</p>

Grant Activity - Nutrient Removal Structures

<p>Description</p>	<p>First priority of this fund will be to apply for NRCS EQIP funding for Denitrifying Bioreactors (NRCS practice code 747) and Phosphorus Removal Structures (NRCS practice code 782 – Vermont). If projects that are marked as high local priority in the Crystal Lake Watershed are not funded by NRCS EQIP this fund will pick up those contracts. Projects will follow NRCS practice standards.</p> <p>Goal is to get 4 of each structure installed in key areas of the watershed. The intent is to allow local landowners to receive cost share to try these practices which to date have not been implemented in the watershed. Phosphorus Removal structure practice code 782 is currently not available in Minnesota. This funding will allow us to try this NRCS practice in Minnesota.</p> <p>Install 4 Phosphorus Removal Systems at an estimated \$10,000 each = \$40,000 covering 75% cost share. Estimated grant paid \$30,000</p> <p>Install 4 Denitrifying Bioreactors at an estimated \$10,000 each = \$40,000 covering 75% cost share. <p>Actual Results</p>	<p>SWCD Staff worked with landowners and the drainage authority to get the best location for the installation of the phosphorus removal structure. The local Crystal Waters Project Non-Profit donated funds to help offset the landowner match expense. One large phosphorus removal structure was installed on the County Ditch 56 Drainage System, Branch 23.</p>

Description

This fund will help pay for the cost of designing the phosphorus removal structures and the denitrifying bioreactors. The local TSA will oversee these designs. The TSA Engineer will be providing the technical approval authority.

This fund will also help pay for staff time to set up the nutrient management plans, the strip till and no till plans, and cover crop designs and guidance for landowners. Actual rates for each staff person will be used and those rates will change yearly.

Grant Paid - \$41,500.00

Local Match - \$10,375.00

Some staff time for contacting landowners and setting up projects will also be counted as local match.

Description

First priority of this fund will be to apply for NRCS EQIP funding for Nutrient Management (NRCS practice code 590), Strip Till/No Till practices (NRCS practice code 329) and Reduced Till practices (NRCS practice code 345). If projects that are marked as high local priority in the Crystal Lake Watershed are not funded by NRCS EQIP this fund will pick up those contracts. Projects will follow NRCS practice standards as guidelines. The Reduced Till (NRCS practice code 345), which has a STIR value rating up to 80, will be capped at a STIR value rating of 50.

Goal is to get 600 acres of nutrient management and 1,350 acres of tillage management. The intent is to allow many landowners to try smaller acres with grant funds. From there the goal is landowner adoption on all acres. These contracts will be for 3 years.

FY15 EQIP Rates (80%/20%)

\$8.17 Nutrient Management Basic (\$6.54/\$1.63)

\$21.39 Nutrient Management Enhanced (\$17.11/\$4.28)

\$40.85 Nutrient Management Enhanced with VRT (\$32.68/\$8.17)

\$11.71 Strip Till/No Till (\$9.37/\$2.34)

\$10.12 Reduced Till (\$8.10/\$2.02)

We will pay 80% of the EQIP rate and landowner will match 20%. This will generate 25% match for this category.

Grant Paid - \$97,500.00

Landowner Match - \$24,375.00

Also include EQIP match for any contracts funded

Actual Results	<p>The SWCD Staff has been collecting data and preparing maps with locations for the best possible no till/nutrient management implementation. We have been meeting with landowners one on one to give information and setup contracts for no till/nutrient management plans. We are working with landowners to finalize their no till and nutrient management plans before encumbering contracts. Some landowners have elected to fund the Nutrient Management plans on their own in order to give them the flexibility to not be locked into a new practice for 3 years. This has resulted in less nutrient management plans being funded by the grant. More contracts are in the works but the following contracts have been installed:</p> <p>1 Nutrient Management Contract for 147.0 acres. 1 No-Till Contract for 182.5 acres. Grant Funds Spent - \$19,541.96 Match Funds - \$4,884.12</p>
